

The Future of Hospitality Construction

NOV 10, 2026

DoubleTree Hotel East | Lafayette, Indiana

Join IRMCA for an up-close look at an ICF hotel currently under construction. The day begins at the [DoubleTree by Hilton Lafayette East](#) with insight into ICF construction and its applications in commercial and hospitality projects.

Attendees will tour the nearby hotel construction site to see ICF construction firsthand and learn how insulated concrete forms can provide strength, durability, energy efficiency, and resilience.

Whether you're an architect, engineer, contractor, developer, or simply interested in learning more about ICF construction, this is an opportunity to see the system in action, not just hear about it in a presentation.
